

FORMAT

This Document is in (AIA) MasterSpec numerical format only to allow for easy referencing of Technical Specifications for compliance. However, it also incorporates information that was authored prior to this Document, and therefore the format differs in some areas.

This Document is not intended to be a verbatim Specification. However, some individual sections are intended to be used as a complete Specification and are identified as such. The DP is requested to use these Sections “as is” or use their own format but incorporate all criteria contained within the DCPS Specification.

Submittals listed in this Document are those that should be copied to the DCPS Project Manager. Any other submittals required by the DP should be added to the Project Specifications.

It is not the intent of this Document to encourage the DP to accept standards that are counter to his normal professional standards. Should such a conflict arise, resolution should be sought through the DCPS Design Manager.
