

GENERAL:

Wood windows should only be used as replacement units in existing structures where it is necessary to match historically established style and only with approval of OFPC Project Manager. Wood windows must be commercial grade to meet required wind and infiltration standards as required by all applicable codes. Windows shall be glazed in accordance with the requirements of the Glass and Glazing Section of these Design Guidelines. Finish systems for wood windows shall be of a cladding material with a permanent finish that does not require painting.

Window functions shall be single hung, double hung or fixed only.

END OF SECTION 08610
