November 21, 2008

School-based training of the district electronic gradebook for the forty Wave I schools began this week. The ITC assigned to each school has worked with the school's administration to create a professional development plan to ensure successful implementation of this valuable teacher tool. These schools will go live with attendance and gradebook on January 20th. To schedule an overview of the gradebook for your faculty, contact your ITC and set up an appointment!!

School Spotlight

Creating a schedule and hiring substitutes to train teachers during the school day is time consuming and costly. Katrina McCray, principal at [Mayport Middle](#), felt it was more than worth both the effort and the expense when it came to developing a plan to implement the district electronic gradebook at her school. Letting teachers know that their time is valued is more than worth the cost of substitutes!!
