

December 10, 2009

Dear Parents,

The department of Academic Services has created Winter Holiday Student Activity packets in Science. This grade-specific packet contains hands-on activities and science problems that were developed to support a science connection between the classroom and home, using fun and enjoyable student and family activities.

We hope these activities with supporting materials will keep your child actively learning during this year's Winter Break.

Happy Holidays,

*The Science Department*
